

Jana Hassan Algarni *Artificial Intelligence Student*

✉ Janahds2005@gmail.com ☎ 966550364104 📍 Dammam, Saudi Arabia 🌐 github.com/jannHds
🌐 linkedin.com/in/jana-algarni-23a679310

AI student passionate about developing intelligent systems and solving real-world problems. Skilled in Python, data analysis, and basic machine learning. Looking for opportunities to enhance my skills and gain practical experience.

EDUCATION

Bachelor of Artificial Intelligence,

Imam Abdulrahman Bin Faisal University (IAU)

08/2023 – Present | Dammam, Saudi Arabia

GPA: 4.64 / 5.0 Specialized in Artificial Intelligence with focus on Machine Learning and NLP Applied data preprocessing, model training, and evaluation techniques

TECHNICAL SKILLS

Technical — Python, Java, C++, Machine Learning, NLP, Scikit-learn, Pandas, NumPy, Matplotlib, Django, MySQL, OOP, GitHub

Soft — Problem Solving, Teamwork, Communication, Time Management, Analytical Thinking

LANGUAGES

Arabic — Native

English — Proficient

CERTIFICATES

- Artificial Intelligence Concepts and Advanced Applications (SDAIA)
- Linear Algebra for Machine Learning and Data Science (DeepLearning.AI)
- SkillsBuild Program (IBM)

VOLUNTEER EXPERIENCE

Content Writer Volunteer,

National Center for Non-Profit Sector

04/2025 – 04/2025 | Saudi Arabia

Completed 48 volunteer hours through the National Volunteer Platform Created written content for community-focused initiatives

Community Support & Media Volunteer,

National Center for Non-Profit Sector

01/2025 – 01/2025 | Al-Qunfudhah, Saudi Arabia

Completed 40 volunteer hours supporting community initiatives Assisted in promoting programs via social media

PROJECTS

Mental Health Risk Prediction 📄,

Machine Learning Project

- Built ML models to predict mental health risk using survey and lifestyle data.
- Trained and evaluated Logistic Regression and Random Forest models.

Road Network Algorithm Comparison 📄,

Algorithm Analysis Project

- Compared Dijkstra and Bellman-Ford algorithms on road network data.
- Analyzed runtime performance across different input sizes.

Sentiment Analysis of Amazon Mobile Reviews 📄,

Machine Learning Developer

- Built a sentiment analysis model using Python and NLP techniques.
- Preprocessed and analyzed Amazon review datasets.
- Trained and evaluated machine learning models.

Spam Detection System 📄, *Machine Learning Project*

Machine Learning Developer

- Built a spam detection model using Python and Scikit-learn.
- Preprocessed text data and extracted features.
- Evaluated model performance using classification metrics.

Legends Restaurant System 📄,

Full Stack Developer (Team Project)

- Developed customer-side features using Django and MySQL.
- Implemented menu browsing, ordering, and order tracking.
- Collaborated with team members using GitHub.

Hotel Management System 📄,

Java Developer (OOP Project)

- Developed a hotel management system using Java and OOP principles.
- Implemented booking and customer management features.
- Collaborated with team members on system development.
